DETAILED ACTION

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Holly et al. (US 5,380,303).

Holly et al. teach the use of an antimicrobial agent in combination with a chelating agent such as EDTA and a buffer in an ophthalmic composition. See the abstract and claim 1. The above reference makes clear that the claimed combination has been previously used in an ophthalmic formulation. The antimicrobial activity of the claimed composition is taught in column 4, lines 35-50. The determination of microbial population and the effective treatment is considered to be within the skill of the medical professionals. To store a pharmaceutical composition in some type of kit or container is the inherent property of any pharmaceutical formulation.
